# Wifi Position Convertor

NOTE: This software is only available for Windows users.

A software to convert multiple MAC addresses into coordinate location data using Mylnikov Geo-location API (https://www.mylnikov.org/).

Instruction (Windows)

Step1: Open **wps_convert** >> **dist** >> **wps_convert** >> **wps_convert.exe**.

Step2: Click "Browse" button to choose the meta folder that contains .wscan.json files. (e.g. H2_Day 1)

Step3: Click "Convert" Button and wait for few seconds. Corresponding CSV file will be generated inside output folder succesfully.

Warning: Do not change any folder location.
